DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 6, and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Edwards et al (5,977,753). Disclosed in IDS filed 4/22/02.

Edwards et al discloses a DC/DC up/down converter, having inductive energy storage means, switching means (20, 22, 32) and control means (G1, G2), wherein said control means are arranged for selectively operating said switching means for transferring an amount of electrical energy from said energy storage means (24, 34) to an output of said DC/DC converter (V1, V2), characterized in that said control means are configured for operatively controlling said switching means for transferring electrical energy to a first output (V2) of said DC/DC converter in a down-conversion mode and for transferring electrical energy from said first output (V2) to a second output (V1) of said DC/DC converter in an up-conversion mode (see figures 5-11).

Allowable Subject Matter

3. Claims 2-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
